

## For the love of Nature....

Dear Parents,

Greetings on The World Environment Day! The World Environment Day 2019 will be hosted by China, with a theme of "Air Pollution". We can't stop breathing, but we can do something about the quality of air that we breathe. Approximately 7 million people worldwide die prematurely each year from air pollution. World Environment Day 2019 will urge governments, industry, communities, and individuals to come together to explore renewable energy and green technologies, and improve air quality in cities and regions across the world. A committed endeavor to provide our children with clean and fresh air to breathe in. An initiative, that can succeed only if we all pledge to reaffirm our commitment and allegiance to Mother Nature. The school has persistently endeavoured to sensitise the students to be concerned and conscientious custodians of their planet. Few efforts put in by school during current academic session are as follows:

- ✓The school has a very active BEST Club and a proactive Green School Club.
- ✓We regularly Conduct air audit and promote use of mass transport (school bus)We have 55% school area as green cover.
- ✓The School has 110 plant species including 40 medicinal plants.
- ✓We send all paper waste for recycling.
- ✓ Annually we collect e- waste and send it for safe disposal through organised sectors.
- ✓ On 24 May 2019, our students participated in #FridayForFuture, an initiative by school students to promote clean air.

The awareness is there, what we need today is, a powerful will to do what it takes to right the wrongs. For love of nature... Let us all pledge to walk the talk.
